

FengYunCast

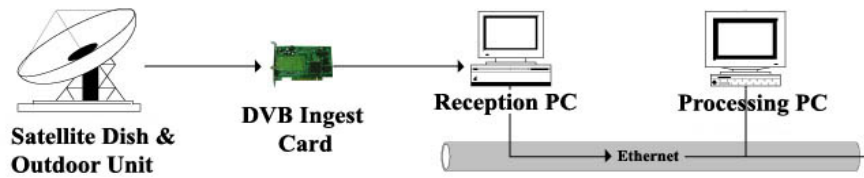

FY-1D, FY-2C, NOAA, EOS

AsiaSTAR-4

China currently operates a Ku band Digital Video Broadcast system that allows Members adjacent to China to receive a range of data from FY1, FY2, the MODIS instrument on TERRA and AQUA and MTSAT-1R.

DVBS User Station Hardware Architecture

FengYunCast, China's contribution to GEONETCast, is a new system in C band, which will have a much larger foot print and will cover all of Asia and much of the South West Pacific.
