

EUMETSAT / ECMWF / Mercator-Ocean DIAS

The C3S Climate Data Store Infrastructure

From data to actionable information

EUMETSAT / ECMWF / Mercator-Ocean DIAS

- DIAS brings in a whole new dimension to the CDS and our services:
 - ✓ Interoperability with other services, starting with CAMS and CMEMS and followed by other Copernicus services, as well as access to the Sentinel data
 - ✓ Opening a full new range of use cases to existing and new users
 - ✓ Cloud-computing resources
 - ✓ Front-office environment, facilitating hugely the services uptake by existing and new players
 - ✓ Build upon the Partner's expertise, knowledge and service provision
 - ✓ User focus: The Copernicus services bring information, not just data
 - ✓ Evolutive and scalable (several releases, scalable cloud)
- Our users regard DIAS as a real asset for data access and the development of new downstream services (climate services, air quality applications, etc.)
