

## Meteosat Coastline Files

EUMETSAT makes available a set of coastlines for several geostationary satellites in their current and previous positions.

Each coastline file is saved in the GIF format with coastlines white, and background black. They are available in several formats:

- coastlines only
- coastlines with country borders added
- coastlines with latitude/longitude crosshair marks
- coastlines with country borders and latitude/longitude crosshair marks

Sub areas are as follows:

- full - Full disc
- rss - Full Rapid Scanning Region
- eur - European Sub Area
- glf - Gulf Region
- mad - Madagascar region

**It is recommended that you right-click on the image link and 'Save As' or 'Save Target As' and use a graphical tool to view the image rather than display the image in your browser.**
